

DO NHAT QUANG

Senior Full-Stack Developer

Tay Ho, Hanoi, Vietnam | D.O.B: 17/12/1996
dnquang1996vn@gmail.com | (+84) 359 785 001
LinkedIn: [linkedin.com/in/quang-do-nhat](https://www.linkedin.com/in/quang-do-nhat)

PROFILE

Senior full-stack developer with 9 years of experience building web products across eCommerce, agriculture, and US healthcare. Started as a frontend specialist (React, Vue) and grew into full-stack development with Node.js, now acting as tech lead — working directly with stakeholders and owning end-to-end solutions from requirement analysis and architecture through delivery.

CORE SKILLS

Frontend: React, Next.js, TypeScript, Redux, Vue.js, HTML/CSS/SCSS, responsive design, web performance optimization

Backend: Node.js (NestJS/Express), REST APIs, PHP (Laravel), multi-tenant & white-label architecture

AI integration: Patient-facing chatbots, AI-assisted SOAP notes, personalized recommendation systems

AI-assisted development: Claude Code, Cursor — beyond daily use: designing agentic workflows, custom skills, and team usage policies for fast, high-quality delivery

Integrations & compliance: Third-party APIs (labs, telehealth, email/SMS), HIPAA & PHI security, state-specific pricing and legal compliance (US)

DevOps & tools: Docker, Linux, AWS, Git, CI-CD, TDD / unit testing

English: Professional working proficiency (TOEIC 780)

WORKING EXPERIENCE

Webprovisé

4/2020 – Present

An American company building eCommerce, agriculture, and healthcare products | FE Developer → Tech Lead

- Tech lead across company products, most recently a HIPAA-compliant US healthcare platform — analyzing stakeholder requirements directly and designing end-to-end solutions across backend, frontend, and AI integrations
- Transitioned from frontend-only to full-stack ownership spanning React frontends, Node.js backends, and AI feature integration
- Built and maintained solid, extensible codebases that absorb frequently changing client requirements
- Reviewing code, estimating work, organizing knowledge sharing, and mentoring team members
- **Company awards:** MVP (2025) · Most Proactive Person (2022) · Shining Star (2021)

TwentyTech

9/2019 – 3/2020

A multinational technology service provider for proptech, based in the UK | Junior PHP Developer

- Implemented features and maintained products; estimated and reviewed tasks, managed releases
- Communicated directly with the UK team to clarify requirements

Alt Plus Vietnam

6/2017 – 9/2019

A Japanese IT outsourcing company located in Hanoi | Intern → Part-time → Software Engineer

- Joined as an intern in my third year of university; selected as a part-time developer for two years while studying, then became a full-time engineer after graduation
- Built a solid software development foundation while contributing to outsourcing, internal, and demo projects

- Selected for the prototype team — building reference projects that set coding standards for other teams to study and follow

HIGHLIGHTED PROJECTS

Welle — US Healthcare Platform — wellehealth.com

Tech Lead · Node.js (NestJS/Express), React, TypeScript

- **Overview:** Personalized longevity and preventive-care platform for US customers — lab test panels covering 180+ biomarkers, recurring test scheduling, telehealth visits, expert clinician consultations, and an AI health coach.
 - Designed the multi-tenant, white-label architecture so the product runs both as a SaaS and with per-client custom logic — extensible and maintainable
 - Integrated AI features: patient chatbot, AI-assisted SOAP notes, and personalized test/care recommendations
 - Integrated multiple third parties across labs, telehealth, email, and SMS; implemented state-by-state pricing and legal compliance
 - Enforced strict US healthcare security requirements: HIPAA and PHI data protection

Bamboo — Cannabis Commerce Platform — getbamboo.com

FE Tech Lead · React, Redux Observable, MUI

- **Overview:** All-in-one platform for legal cannabis distribution in the US — seed-to-sale traceability, sales CRM, inventory, order processing, and fulfillment for wholesale and retail, synced with state regulatory systems (Metrc, BioTrack, CCRS) across 25+ states.
 - Led the frontend of a microservice system with a consistent design language across products (Portal, Trace, Sales)
 - Built highly reusable components with strong UX and DX — e.g. data tables with column resize/freeze/reorder, grouping, trees, sticky headers, and filters — with careful performance optimization
 - Designed for per-state polymorphism: one codebase adapting to each state's regulator and compliance requirements, with fully tracked traceability data under strict federal and state policies
 - Integrated diverse third-party sellers and wholesale/retail services

Property Data Platform

TwentyTech · Laravel, Vue.js

- **Overview:** Property-services marketplace in the UK connecting users with real-estate and home-moving services (similar to batdongsan.com in Vietnam) — service booking, property data lookup, subscription or direct purchase, and an admin portal for the sales team.
 - Turned large provided datasets into intuitive, visually engaging service views that drive user engagement
 - Built data export in Excel and map views; filter-based property search and ordering

EDUCATION

Hanoi University of Science and Technology

August 2019

Engineer's Degree in Information Technology — Good classification
